# Key Points

01/20/19 - 01/26/19

## Sunday

- Another round of precipitation over northern CA. Locally heavy rain possible.
  - Debris scar flooding possible over the Camp Fire – the best chance of heavy rainfall rates this afternoon and evening.
  - Strong winds and cold temperatures could make travel difficult on Interstate 5 near the Grapevine late tonight into Monday.
- Heavy snow and gusty winds are expected to impact travel over the Sierra.
  - Strong winds could cause damage to snow laden trees.
- Along the eastern Sierra slopes, strong winds out of the west at 35 to 45 mph with gusts up to 70 mph are possible this evening into early Monday morning.
  - Damaging winds will blow down trees and power lines. Power outages are possible.
- Minor coastal flooding possible along the northern CA coast.
  - High astronomical tides will cause minor flooding in low lying areas along the Redwood Coast and Bay Area today.

# Key Points

01/20/19 - 01/26/19

## Monday

- Periods of snow early Monday will cause primarily travel difficulties over the Sierras.
- Minor coastal flooding possible along the northern CA coast on Monday.
- Strong winds may blow down limbs, trees, and power lines across coastal (Bay Area), southern and inland CA. Scattered power outages are possible.

## Tuesday-Saturday

- Gusty Santa Ana/offshore winds are expected to develop Tuesday across southern CA.
- Minor coastal flooding possible along the northern CA coast on Monday.
- No major impacts expected Wednesday through Saturday.

# California Weather Impacts

01/20/19 - 01/26/19

<u>Hazards / Day</u>	SUN	MON	TUE	WED	THU	FRI	SAT

# Sunday Storm Total Precipitation Forecast for Recent Burn Scar Areas

Debris flows possible in thunderstorms and heavier showers this afternoon and evening

# 6-10 Day Outlook (Jan 25-Jan 29)

## Temperatures

- Above normal temperatures favored across the state with moderate to high confidence

## Precipitation

- Below normal precipitation favored across the state with moderate confidence

# 8-14 Day Outlook (Jan 27-Feb 2)

## Temperatures

- Above normal temperatures favored across the state with moderate confidence

## Precipitation

- Below normal precipitation favored across the state with low confidence

# **WEATHER OF CONCERN**

## **NORTHERN CALIFORNIA**

- Valley rain and heavy mountain snow are expected today as a Pacific frontal system passes through the area. Breezy south winds will accompany the front. Mountain travel impacts are likely. Scattered evening thunderstorms are possible. Colder air is expected to drop snow levels to 4,000 feet overnight.
- A Flash Flood Watch is in affect until 2100 hours today for some inland portions of northern California. Flash flooding and debris flows are of particular concern in the Camp fire area as periods of thunderstorm activity with heavy rainfall is possible over the burn scars.
- The Sierra Avalanche Center in Truckee has issued a Backcountry Avalanche Warning for periods of high avalanche danger through 0700 hours tomorrow morning.
- Moderate precipitation is expected over the Sierra Cascade range, prompting Winter Storm Warnings & Watches through tomorrow morning.

## **SOUTHERN CALIFORNIA**

- Strong and gusty northwest to north winds will affect many locations tonight and will continue throughout the day tomorrow.
- Gusty Santa Ana winds are expected to develop Tuesday morning.
